Informed_User's Shin Megami Tensi IV fusion guide and demon list. Copyright 2013. For hosting on GameFAQS only.

Fusion Guide:

I will list one of the combinations you can use to get fuseable demons of a certain race, I will not list all possible combinations.

This guide is a work in progress. With 400+ demons including many down-loadable-content, DLC, demons that must be purchased seperatly, making a complete list is hard. I know this guide is currently missing information on most of the Famed and Fiend demon types. I don't have any of those demons yet, but I will include info on them when I get some.

Generally, you fuse two demons of a different race to get a higher/average level demon of a third race. Fusing two demons of the same race usually results in an elemental.

Fuse a normal demon with one of the four basic elementals, Erthys, Aeros, Flaemis, Aquans, to get a higher or lower level demon of the same race as the normal demon. In other words, you get the next tier up or down in strength for that race. You won't get an option to fuse the weakest demon of a race, bottom tier, with an elemental if the fusion would result in a down fusion. Some of the more powerful demon races require the use of the advanced elements, Gnome, Sylph, Undine, Salamander, to fuse up or down.

Some demons require the special fusion option to get. Some demons are locked and can't be fused until you meet a special condition, which is usually meeting/defeating that demon as part of the story or as part of a challenge quest.

Elementals:

Jirae+Jirae=Erthys Yoma+Yoma=Aeros Wilder+Wilder=Aquans Jaki+Jaki=Flaemis Reaper+Reaper=Gnome Holy+Holy=Sylph Megami+Megami=Undine Deity+Deity=Salamander

E,Ae,Aq,F,G,Sy,U,Sa stand for the element you use to move up or down race tiers.

Mediums:

The demons Tenkai, Yaso Magatsuhi, Omoikane, Michizane, Koga Saburo, and Yamato Takeru are locked and can't be fused until you get their mediums. You get the mediums by going back, late in the game, to the Hills building, Tayama's office, after finishing the Yamato Reactor events. The Hills building is east of Shibuya. With the mediums, go to Midtown, east of Shibuya, to unlock Tenkai. Go to the lab under Midtown to get Yaso Magatsuhi. Go to the tunnel north of Shibuya to unlock Koga Saburo. Use the tunnel to reach the reactor building where you get Omoikane, Michizane and Yamato Takeru. You can't get those last three if you are on Law route.

Demon Races:

Undead: The only way to get most undead is by fusion accident. According to Gamefaqs bord users you can increase the odds of an accident by fusing a dead Foul demon with another dead demon, no hp left. The demon that results from an accident is usually around the level of what the normal fusion demon would be. So it helps to fuse demons that result in something close in level to the demon you are trying to get by means of a fusion accident.

Famed: 3 of them are special fusion and require mediums. The other Famed demons are gained by fusion accident.
